

Going to the

Doctor

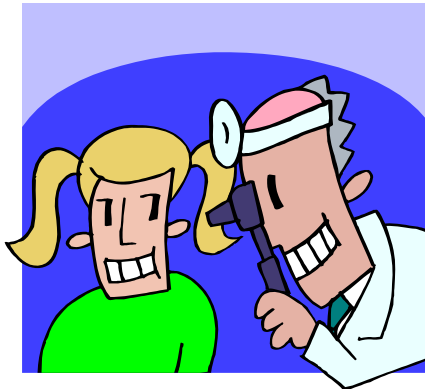

Sometimes everyone needs to go to the doctor. It might be because we are hurt or just to make sure everything is okay.

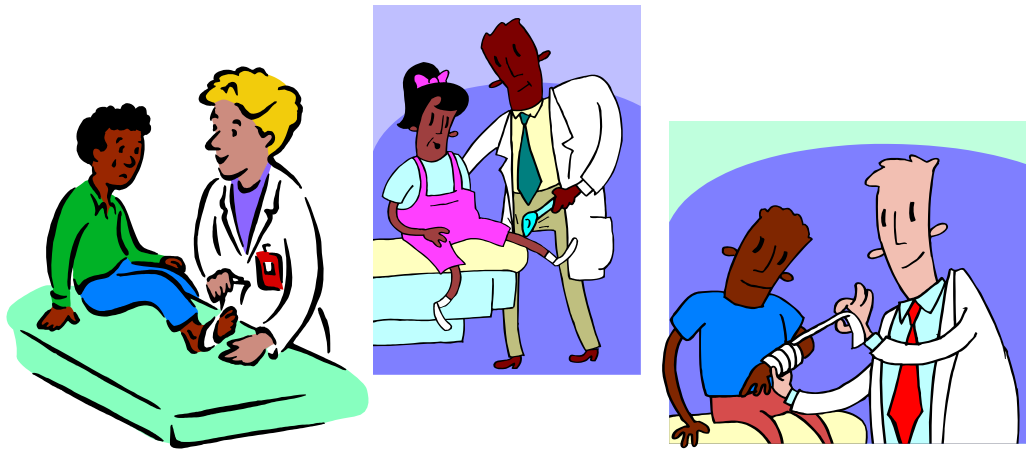

First we will get in the car to drive to the office.

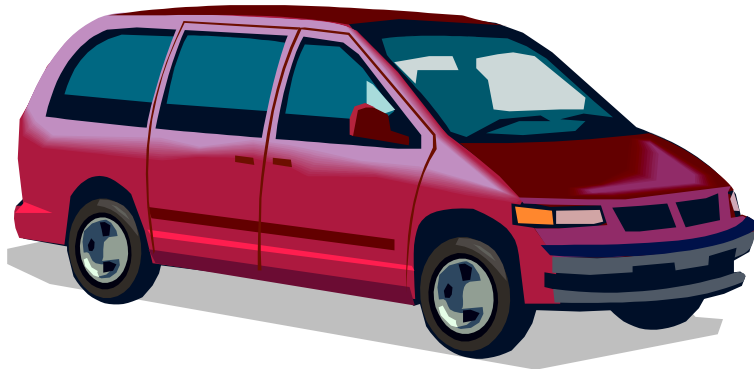

When we get there we might have to wait
in the waiting room.

After going into the exam room, a nurse or doctor might
look in your ears or take your blood pressure on your
arm.

They might also look at your leg, your arm, or your feet.

When we are all done we will get back in the car and
leave.
